

## RICHARD WENDELL REMINGTON

1214 Simplicity, Irvine, CA 92602  
(714)/654-7181(w) or (714)/389-1137(m)  
richardremington@mac.com

**DESIRED POSITION:** Web Administrator

**OBJECTIVE:** To maintain a complex corporate web services infrastructure in good health while increasing my knowledge of the same.

### EMPLOYMENT HISTORY:

Soft Motion Studios - Newport Beach, California

Term: June, 2002 to Present

Title: Video Production Engineer

Experian Credit Services - Costa Mesa, California

Term: August, 2000 to September 2004

Title: Systems Engineer Expert (First year as Sun Microsystems contractor; then FTE)

Duties Included:

- The routine development and enhancement of monitor shell scripts that incorporate Expect, OpenSSL, and Telnet libraries for accessing Webservers and application servers in the development, testing, staging and production environments for the purpose of increasing system availability to 99.99% and even 99.999%.
- The writing of a specific ksh script called nswd (network services watch dog) that incorporated standard unix rc start/stop routines for re-establishing access to previously locked network services following network availability issues. The nswd script runs at the top of every minute and corrects network services issues in less than 10 seconds.
- The deployment of software updates using both Sun Microsystems patches software and the standard C environment [configure/make/make install] procedure.
- The development of ksh scripts triggered by the System V cron service to encrypt and securely copy large ASCII log files from production web and application servers to internal log analysis systems using a combination of ssh and scp/rcp routines.
- The creation of a system, that via standard sed, awk, and grep routines makes available specific data in log files for easy viewing by management via an SSL-secured Webserver.
- The installation and configuration of Apache/iPlanet web servers as needed.
- Supporting load balanced HA (high availability) solutions.
- Managing Experian's internal Digital Certificate Authority.
- Supporting BEA WebLogic developers on eCommerce projects.
- Managing log files for public & extranet Web sites.
- Providing log data feeds to NetIQ WebTrends.
- Maintaining configuration files for B2B projects.
- Administering iPlanet SSL secure web server complex.
- Architecting Web environments for eCommerce solutions.
- Supporting legacy CGI programs in multi-tiered environment.
- Maintaining multilevel Development -> Test -> Stage -> Production environments.
